

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

February 8, 2006 LB 875

force the situation around to something that can be reasonably...

SENATOR CUDABACK: One minutes.

SENATOR BEUTLER: ...or that is reasonably regulated. Having said that, there is some other information in here which is good to get into the record, but I think at this point, I will stop and go on with my next opportunity to speak. Thank you.

SENATOR CUDABACK: Thank you, Senator Beutler. Senator Thompson.

SENATOR THOMPSON: Thank you. I would yield my time to Senator Mines.

SENATOR CUDABACK: Senator Mines.

SENATOR MINES: Thank you, Senator Thompson. Mr. President, thank you. I want to reassure everyone that we are just dancing for the next few minutes until Bill Drafters returns the amendment that has been agreed to by all parties at this point. And I want to again thank you for your patience and for your attention, and want to reemphasize what has been said several times, is, this does (laugh)...we may have a group hug or we may not, Senator Schrock, but I want you on my side of that hug. This particular bill, or, excuse me, this particular amendment does offer protection for Nebraskans. What it does not do and cannot do is protect them beyond what the federal government will. Director Tim Wagner of the Insurance Department is a member of the Nebraska Association of Insurance Commissioners, and he and that organization are working toward a federal solution to service contracts. See, Nebraska is not the only place where we have, or only state where we have had experience with default, and so it is truly a federal issue. However, that could take time and probably will take time, so I appreciate your concurrence in this. The amendment that is being delivered at this very minute is a work that is done by the lobby, it is work done by Senator Beutler and committee staff, and this is an agreed-to amendment, and I would urge the adoption of this amendment, AM2190, that will be amended very soon. So
